

# Simple, fast end-to-end document creation and distribution

## WinVoicePro

[voicetechnologies.co.uk/winvoicepro](http://voicetechnologies.co.uk/winvoicepro)

WinVoicePro is a document creation and workflow management application developed by Voice Technologies in collaboration with the NHS, to save healthcare providers time and money.

It is a complete end-to-end solution that allows users to create letters, reports and other documents and distribute them electronically or in print.

It is highly adaptable having been designed to work seamlessly alongside existing software to make the job of document creation easier and faster.

It can be used on the move too with an optional mobile add-on that enables users to view, edit and authorise documents anywhere to avoid delays.

WinVoicePro: FileStream enables you to upload and convert files into documents for easy searching and distribution.

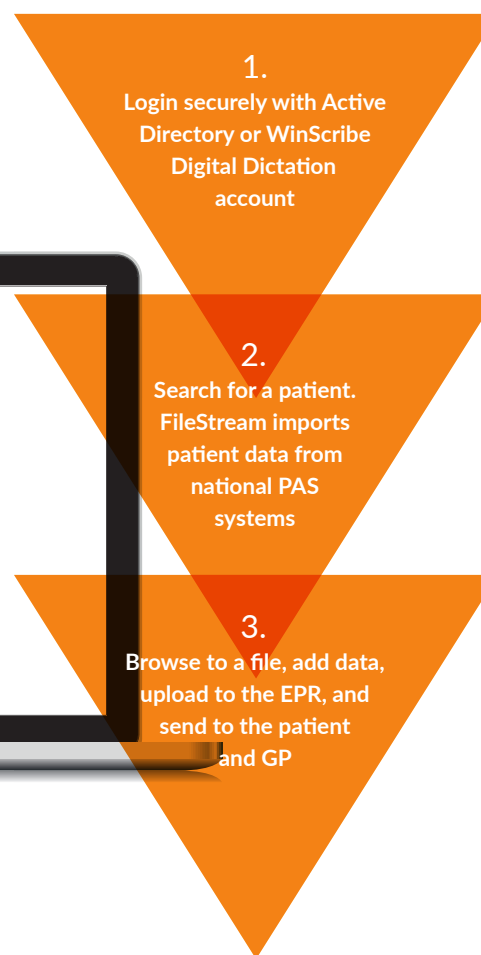

FileStream is a WinVoice Pro add-on that interfaces with applications such as Medisoft and Vitalpulse, enabling documents originated in them to be distributed via WinVoice Pro rapidly and securely.

## Browse

From FileStream's web page, you can simply enter the patient's identifier and browse to the PDF or Word files you wish to import into WinVoice Pro as verified documents. Files are imported complete with their metadata. Information can be added to the document before being distributed simultaneously via WinVoice Pro to multiple recipients – the patient, the Electronic Patient Record (EPR) and the patient's registered GP.

## Automate

Verified files from other applications can be exported, including document metadata, and sent automatically via FileStream. The system offers simultaneous distribution to the patient, the EPR and the patient's registered GP.

## Key Features

- ▶ Imports PDF or Word files into WinVoicePro
- ▶ Files converted to searchable and viewable documents
- ▶ PAS look-up and speciality code assignment built-in
- ▶ Documents uploaded to EPR (Electronic Patient Record)
- ▶ Electronic distribution via a GP interface or print and post.

## Key Benefits

- ▶ Fast, easy access to previously unsearchable documents
- ▶ Appropriate permissions applied for viewing and printing documents
- ▶ Capture and share information with GPs easily.
